### Important Information

- Please read all instructions completely before starting any part of the installation.
- Evolutions Rail<sup>™</sup> should be installed using the same good building principles used to install wood, composite, or metal railing and in accordance with the local building codes and the installation guidelines included below.
- AZEK® Building Products accepts no liability or responsibility for the improper installation of this product.
- Evolutions Rail may not be suitable for every application and it is the sole responsibility of the installer to be sure that Evolutions Rail is fit for the intended use. Since all installations are unique, it is also the installer's responsibility to determine specific requirements in regards to each rail application.
- AZEK<sup>®</sup> Building Products recommends that all applications be reviewed by a licensed architect, engineer or local building official before installation. If you have any questions or need further assistance, please call AZEK Customer Service at 877-ASK-AZEK (877-275-2935) or TimberTech Customer Service at 800-307-7780, or visit our website at www.azek.com or www.timbertech.com.
- Evolutions Rail is tested as a whole system and should be used that way. It is not intended to be used in conjunction with other railing systems or fasteners.
- The following Installation Guidelines are applicable for installation of Evolutions Rail only.
- IMPORTANT: Make sure the DRIVE TOOL/DRILL is configured or set to use the SCREW setting when driving and/or tightening all FASTENERS.
- SAFETY: Always wear goggles when handling, cutting, drilling and fastening materials.
- Failure to install this product in accordance with applicable building codes and Evolutions Rail's written Rail Install Guide may lead to personal injury, affect rail system performance and void the product warranty.
- The buildup or generation of static electricity is a naturally occurring phenomenon in many plastic based products such as carpeting, upholstery, and clothing, and can occur on alternative decking under certain environmental conditions. This static electricity can discharge once contact is made with hardware, railing, or other conductors of electricity.

Hardware included in

Hardware Kits:

Visit www.timbertech.com/installation to view TimberTech installation videos. Consult your local building codes for guard and handrail requirements.

## Evolutions Rail<sup>™</sup> Contemporary Rail Packs are available in 6' or 8' lengths.

## **Measuring Your Railing Area**

- Measurements are from center to center of post. Packs are produced to 6' and 8' to allow for finished end cuts and angles.
- Determine how many 6' or 8' Contemporary Rail packs you need and check to be sure you have all the components (and quantities) listed in the chart and shown to the right.

#### **Important Information**

- Contemporary Style 6' and 8' Packs are designed not to
- exceed 6' and 8' center of post to center of post, respectively.
  - Cut slowly, using a fine tooth saw blade to avoid chipping.

Intermediate Base Plate

Quick-Connect

. Swivel Fitting

- For 42" railing, use 8' Post Sleeves.
  Evolutions Rail Contemporary Style is designed an
- Evolutions Rail Contemporary Style is designed and tested solely for over the post applications with the top rail profile affixed to the top of the structural 4x4.
- This does not include applications where the 4x4 posts extend above or through the top rail profile.
- Evolutions Rail Contemporary requires a top rail profile (deck plank) to complete the system for a proper installation and code compliance.

#### Components Needed For Installing One Contemporary Style Rail Section

4 - Hinged Brackets

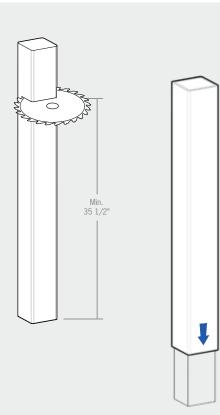

11 - #10x2" Screws

8 - #10x7/8" Screws

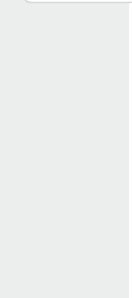

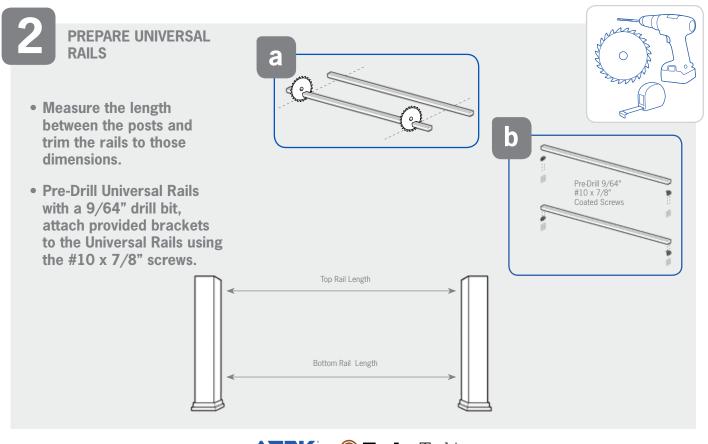

- Posts must be positioned no more than 8' on center, and must be plumb.
- Trim post a min of 35 1/2" (for 36") or 41 1/2" (for 42") above finished deck surface.
- Slide Post Sleeve over 4x4 Post (do not force).

\Lambda Do not cut Post Sleeves in this step.

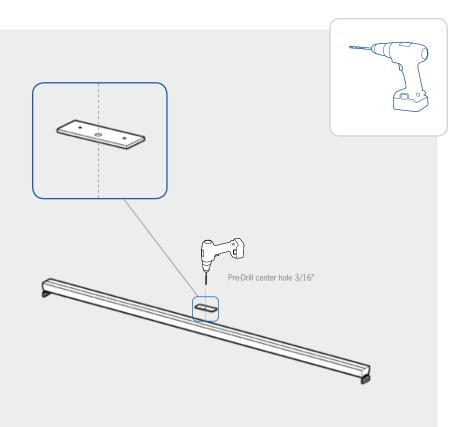

DETERMINE INTERMEDIATE BALUSTER LOCATION

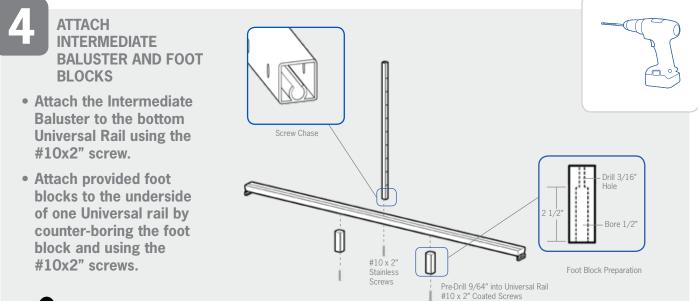

• Use the Intermediate Base Plate of the Intermediate Baluster as a template on the bottom Universal Rail.

1' to 6' on center requires 1 Intermediate Balusters. 6' to 8' on center requires 2 Intermediate

Balusters.

Pre-drilled hole will be offset from the centerline.

Be sure the screw finds the screw chase. For easier installation, pre-drill screw chase with a 3/16" drill bit.

**For sections up to 6':** Place two Foot Blocks at 1/3 intervals on the rail. **For sections 6' to 8':** Space three Foot Blocks approximately at 1/4 intervals on the rail.

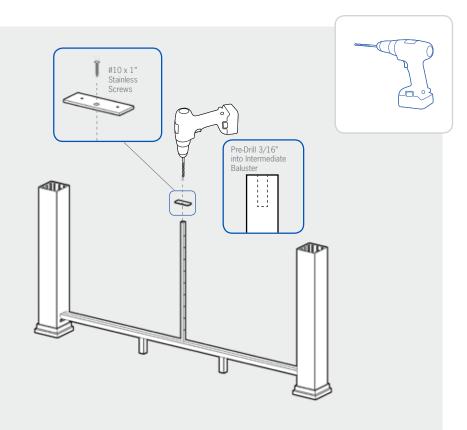

#### ATTACH BASE PLATE TO INTERMEDIATE BALUSTER

- Place the bottom Universal Rail and allow the rail to rest on its foot blocks.
- Attach base plate to the Intermediate Baluster.

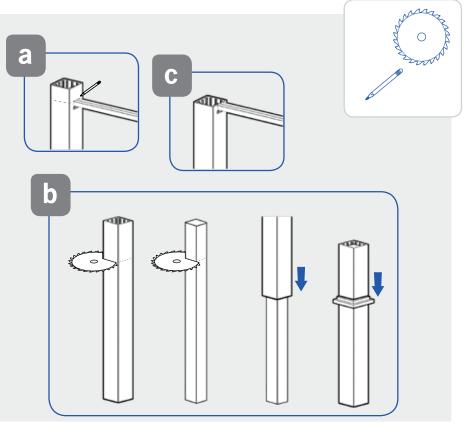

## MEASURE AND CUT POST SLEEVES

- Temporarily install top Universal Rail.
- Mark the height of the Post Sleeves.
- Cut your Post Sleeves and posts to desired length.
- Place the Post Sleeves over the 4x4" posts.
- Slide Post Skirts over Post Sleeves.

Post Sleeves should be flush with the top Universal Rail.

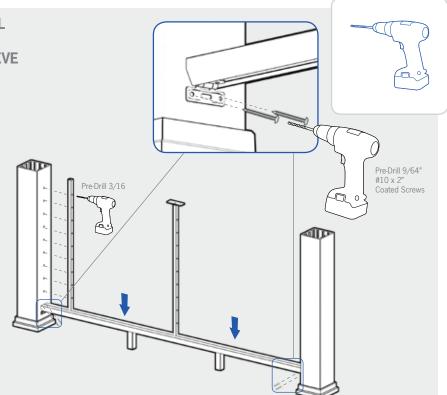

7

ATTACH BOTTOM UNIVERSAL RAIL AND TRANSFER HOLE LOCATION ONTO POST SLEEVE

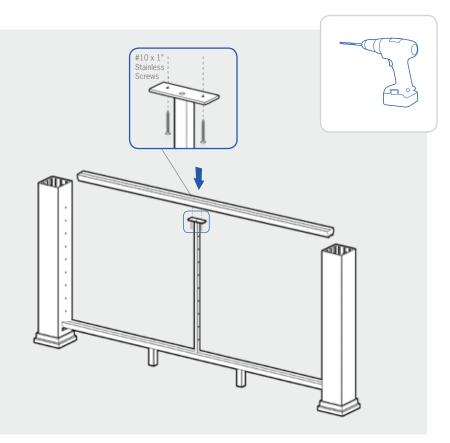

- Set the bottom Universal railing into place and Pre-Drill pilot holes through the Post Sleeve and into the post through the bracket holes. Secure with #10x2" screws.
- Use an extra Intermediate Baluster as a template for the CableRail hardware and through holes. Use a 3/16" drill bit to transfer your marks to the Post Sleeves.

8

TRIM TOP RAIL AND SECURE TOP UNIVERSAL RAIL

• Attach Intermediate Baluster to the underside of the top Universal Rail with 2 #10x1" screws.

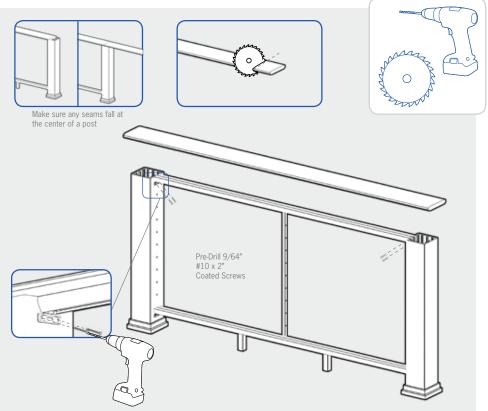

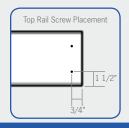

SECURE TOP UNIVERSAL RAIL & TRIM TOP RAIL

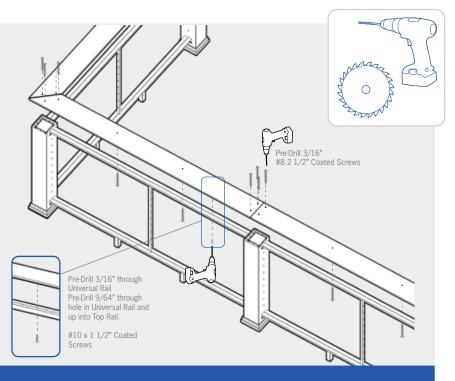

- Pre-Drill pilot holes through the Post Sleeve and into the post through holes in the brackets of the top Universal Rail and fasten using #10 x 2" Coated Screws.
- Cut the Top Rail so that any seams fall at the center of a post.

- Cut Top Rail so that any seams fall at the center of a post. Miter the planks at corner posts.
- All fastener locations must be pre-drilled with a 3/16" drill bit, or mushrooming or splitting may occur.

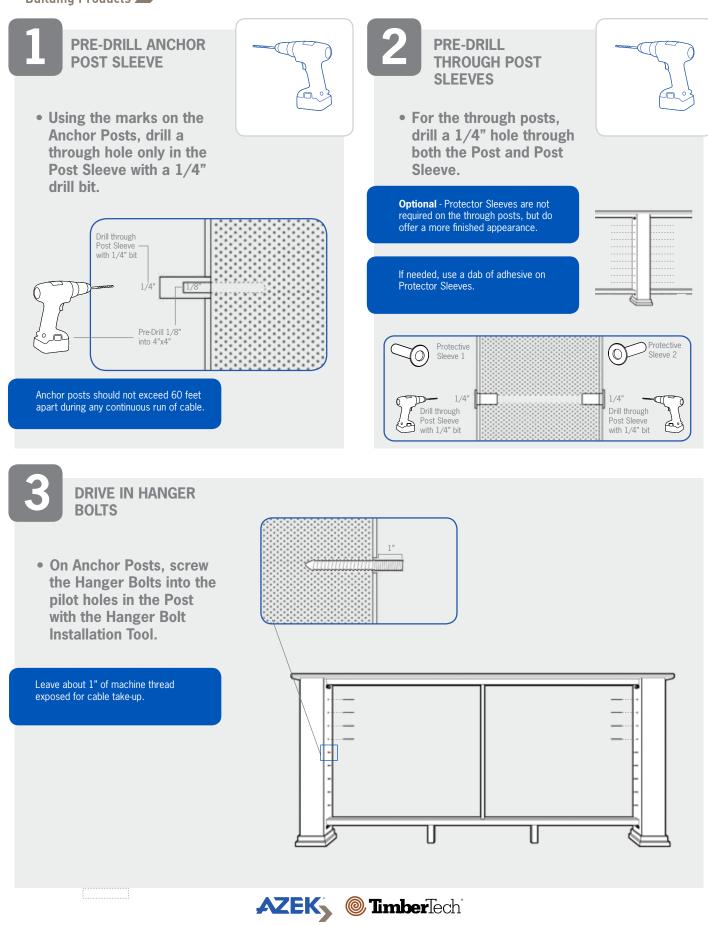

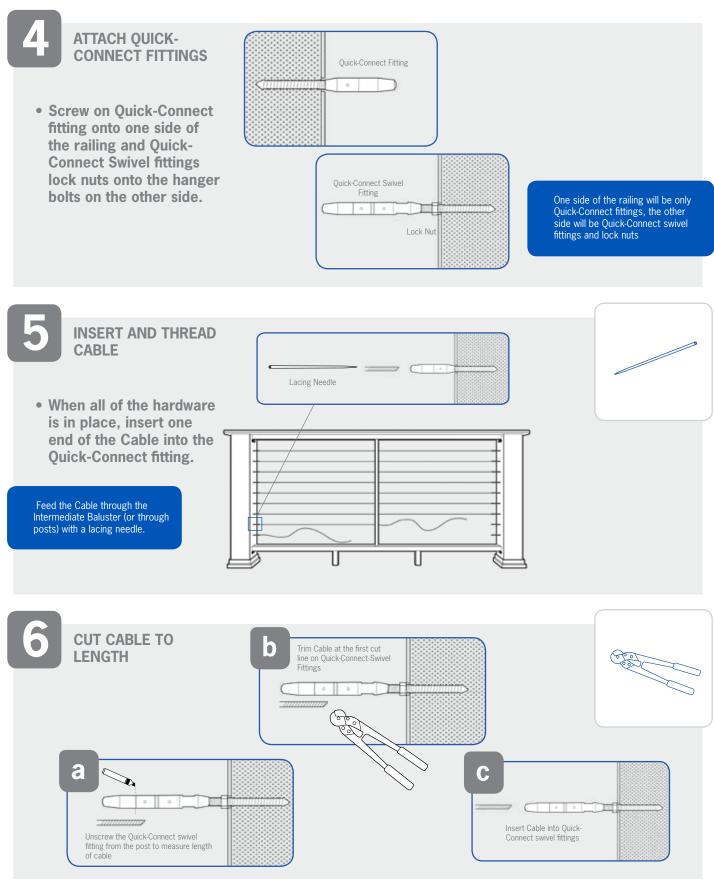

If your rail has stair sections, start installing the cap at the stairs. Wait until all rail sections are complete before beginning Top Rail installation.

**TIGHTEN CABLE** 

• Use a set of 3/8" openended wrenches to tighten the Cable using the "swivel" end insuring the Cable does not twist.

If necessary, the Cable can be removed from the Quick-Connect fitting by using the Quick-Connect Release Tool.

• Once the Cable is tight, tighten the lock nuts against the Quick-Connect fitting.

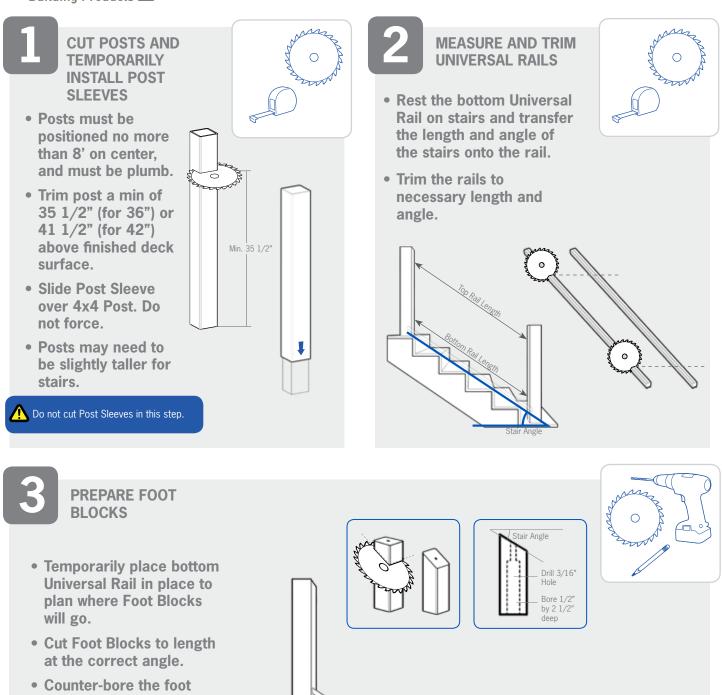

**Tightening Order** 

Installing Evolutions Rail<sup>™</sup> Contemporary Stairs with CableRail by Feeney<sup>®</sup>

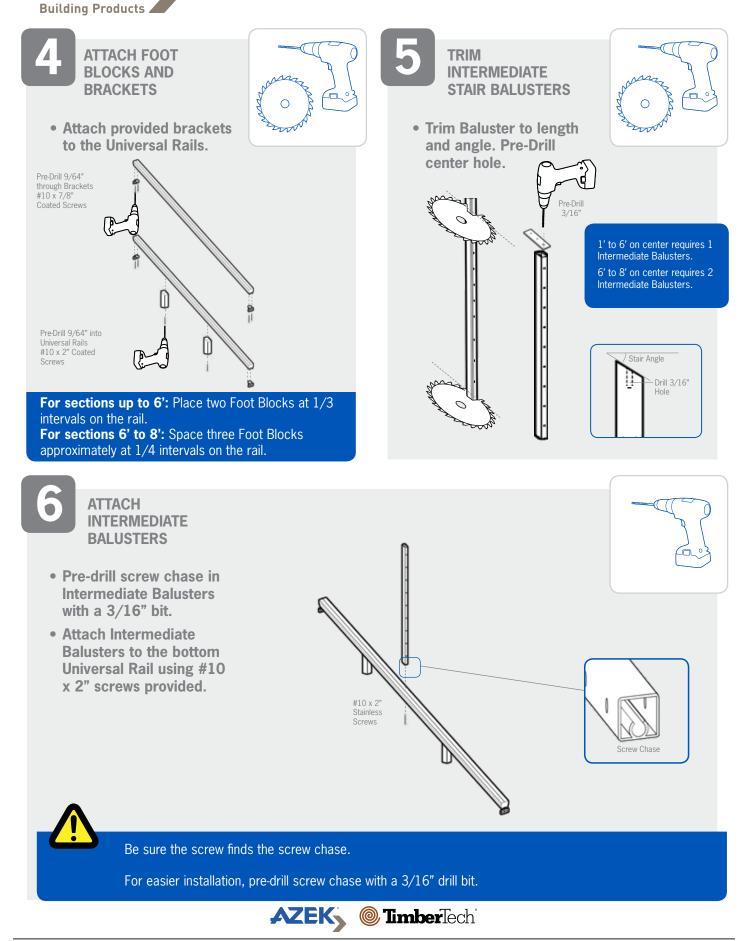

• Counter-bore the foot block and using the #10 x 2" screws

ATTACH BASE PLATE TO INTERMEDIATE BALUSTERS

- Set the bottom Universal Rail in place and allow the rail to rest on its Foot Blocks.
- Attach base plate to the Intermediate Baluster.
- Place top Universal Rail on assembly but do not fasten.

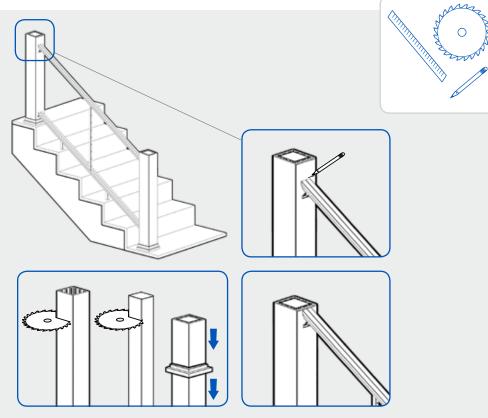

MEASURE AND TRIM TOP POST AND TOP POST SLEEVE

- Mark the top of the top Universal Rail.
- Remove Post Sleeve and trim to length, then Trim Post to same length.
- Replace Post Sleeve.

Post Sleeves should be flush with top Universal Rail.

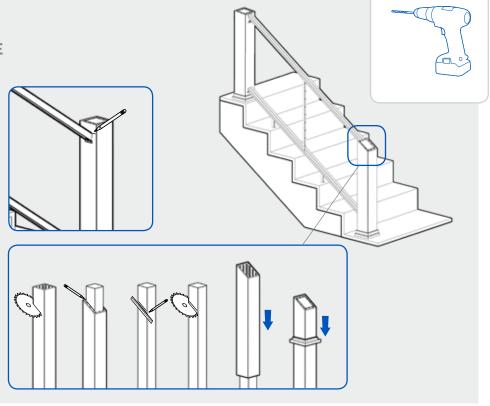

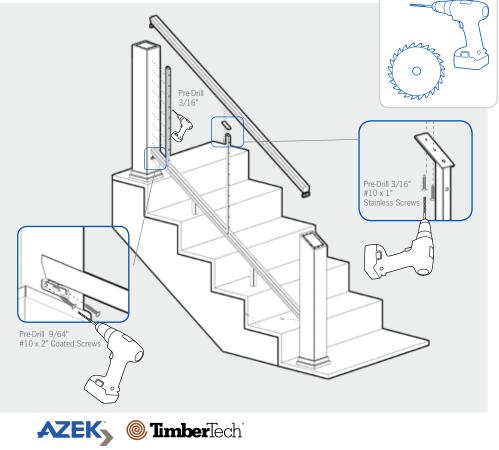

MEASURE AND TRIM BOTTOM POST AND BOTTOM POST SLEEVE

- Mark where Top Universal Board meets Bottom Post Sleeve.
- Remove Post Sleeve and trim to stair angle. Replace Post Sleeve.
- Use Post Sleeve to mark the angle of cut on Post. Remove Post Sleeve.
- Using a straight edge, draw a line roughly 1/8" below previous mark on Post.
- Trim Post at lower line.
- Replace Post Sleeve.
- Slide on Post Skirts.

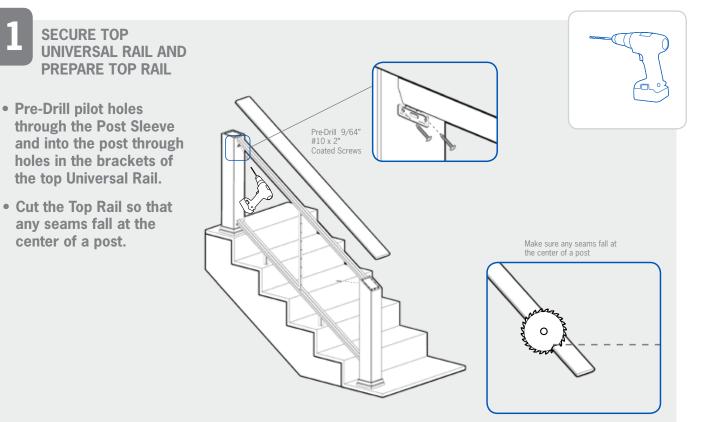

- Attach the Bottom
  Universal Rail to the Posts
- Attach Intermediate Baluster to the underside of the top Universal Rail with the 2 #10x1" screws.
- Use an extra Intermediate Baluster, rested at the bottom Universal Rail, as a template for the CableRail hardware and through holes.
- Use a 3/16" drill bit to transfer your marks onto the Post Sleeve.

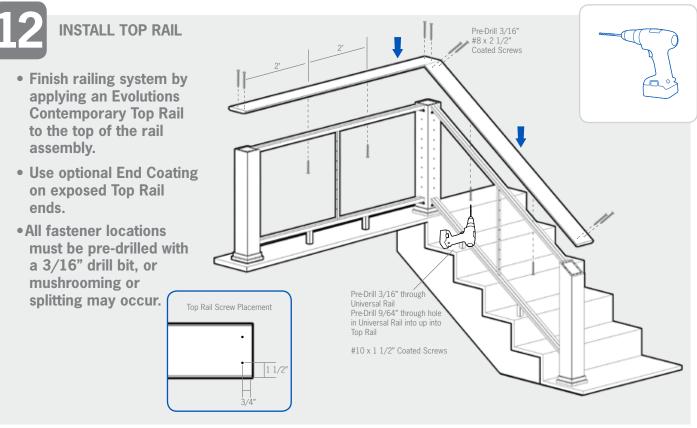

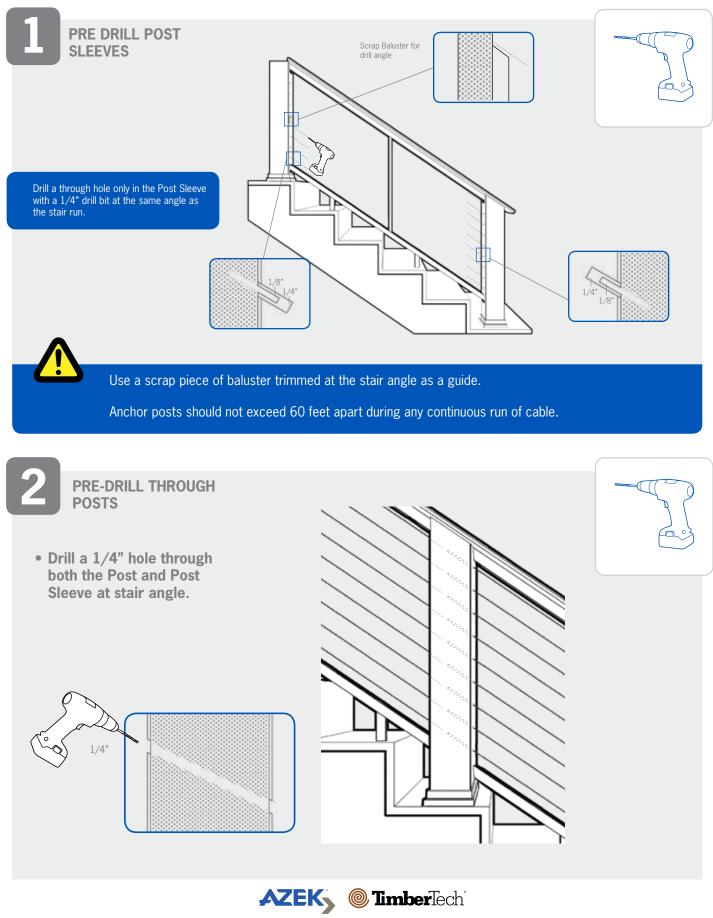

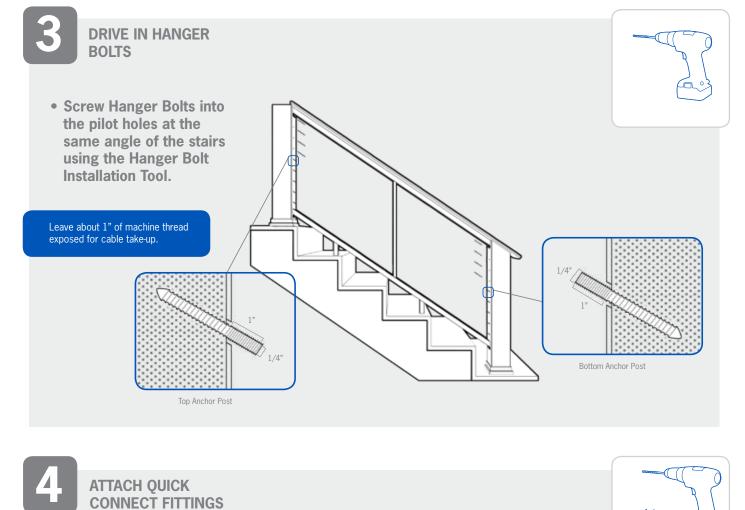

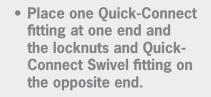

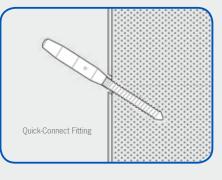

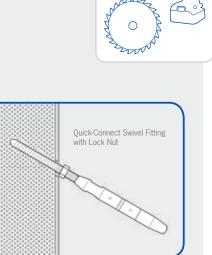

Installing CableRail by Feeney<sup>®</sup> Stairs for Evolutions Rail™ Contemporary

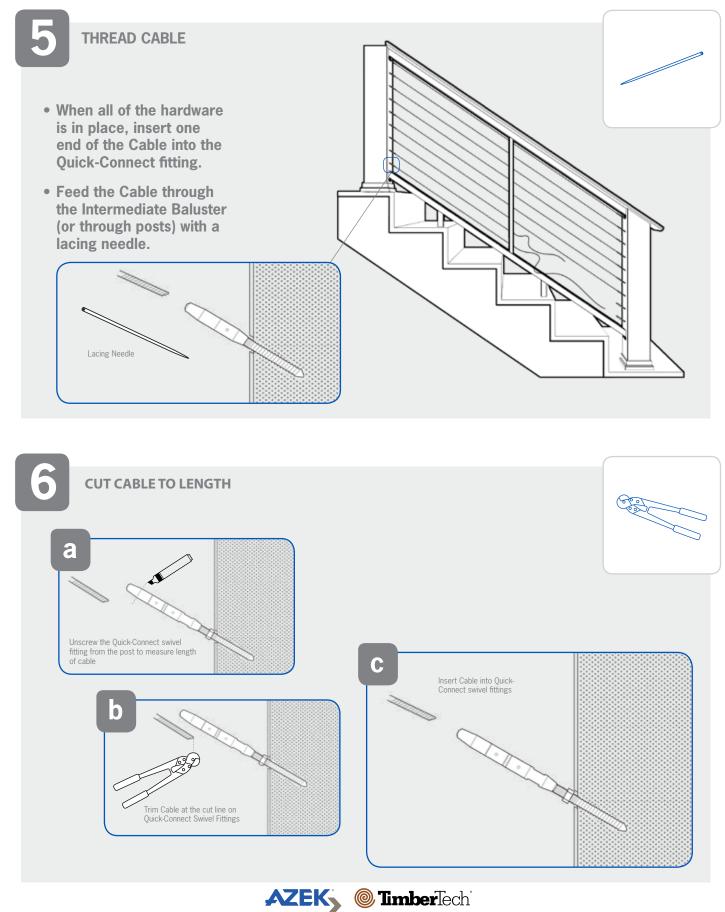

One side of the railing will be only Quick-Connect fittings, the other side will be Quick-Connect swivel fittings and lock nuts.

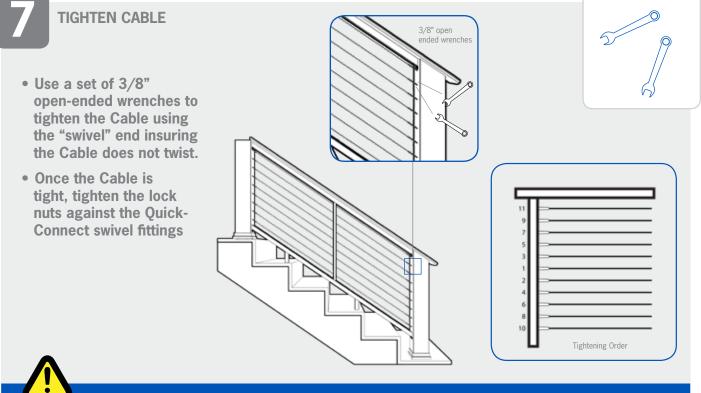

Page 17

If necessary, the Cable can be removed from the Quick-Connect fitting by using the Quick-Connect Release Tool
