

Hanger Bolt Installation Tool Part #3988

File#2011-324

1) Lock the *Installation Tool* into the chuck of a 1/2" electric drill (or use 3/8" socket wrench).

2) Spin the machine thread end of the Hanger Bolt all the way into the *Installation Tool*.

3) Using a low speed, drive the Hanger Bolt into the pilot hole (or Masonry anchor) to the recommended depth.

4) Reverse the spin direction of the electric drill to free the Hanger Bolt from the *Installation Tool*.
