

**Usage:**

These versatile LED recessed lights can be used under cabinets, in cabinets, beneath cabinets; just about anywhere you want to have a light. The low profile mounting bar has a front face of 1/4" and with the powerful light strip the No See Em light can even be used on stair faces or as floor lighting.

**No See Em Indoor Kit contains:**

- (4) NOSEEM LED Light Strips
- (4) NOSEEM Mounting Bar
- (1) 12" Retaining cord
- (4) NOSEEM Adhesive Mounting Strips
- (3) PLUG-N-PLAY 5' Cable
- (1) EZ Indoor Power Driver (24 watt)
- (1) Transformer to WP Connector 20' length
- (1) Instructions

**INSTALLATION**

Prior to any installation, check local building and electrical codes and secure any permits if required.

**Transformer Location** Determine where you will plug in your transformer / power supply. Locate transformer in a location that is accessible in the unlikely event of servicing. Transformer may be hooked up to a switched wall outlet or you may hard wire the transformer directly to a switched circuit. You must leave access to the transformer per electrical code.

NO SEE EM LED Lights can be mounted in many locations. In cabinets, under cabinets, base board floor lighting. Mounting instructions are the same for any location. Under-cabinet shown as example.

1. Determine location of first NOSEEM LED Light Strip. Measure to make sure full bar will fit.
2. Mark location of screw holes. It is suggested to use at least 3 screws per strip.
3. Pre drill screw holes with 1/16" dia. drill bit.

 UNDER CABINET  
 FLOOR LIGHTING

4. Mounting bar can be attached using adhesive strip (supplied). Optional: Can be mounted using small screws(not supplied).
5. Slide NOSEEM LED Light Strip into mounting bar.

6. Secure NOSEEM LED Light Strip into Mounting Bar with small sections of Retaining Cord. Recommended 1" - 2" sections placed at cut marks on LED light strip tucked between mounting bar lip and LED light strip.

Repeat steps with each additional section.

7. Connect first light strip to Transformer with Transformer to Water Proof Connector cable. Then connect each NO SEE EM Light strips with PLUG-N-PLAY cable.

**LENGTH CUSTOMIZATION** - NO SEE EM LED light strips and mounting bars can be cut to fit smaller sections at the end of a run or to fit smaller spaces. This terminates the power at the end of the light strip. Use a 6-Port Plug and Play Splitter if multiple short ends are needed. (EZPLUGNPLAYSPLITTER is available at DEKORLighting.com)
