

The logo consists of the word "SIMPSON" in white, bold, sans-serif capital letters on a black rectangular background.The logo consists of the words "Strong-Tie" in white, sans-serif font on an orange rectangular background. The "T" in "Tie" is stylized with a horizontal bar that extends to the left.

®

A close-up photograph of a person installing composite decking. A power drill is shown driving a screw into a dark brown composite board. The board has a wood-grain texture. In the background, wooden joists and other composite boards are visible. The overall scene is outdoors, with some greenery in the distance.

Composite-Decking Meets Its Match

Match our screw colors to your decking with this guide.

When choosing a premium composite, PVC or encapsulated decking material, two factors outweigh all others: appearance and color. Simpson Strong-Tie has a complete line of fastening solutions to ensure that the appearance of the deck is not compromised by noticeable fasteners.

These hand-drive and collated fasteners are available in a color palette specifically formulated to match a wide range of the most popular decking systems and are designed to blend into the decking material.

Three overlapping white circles of varying sizes are positioned in the bottom right corner of the page, partially overlapping the text and the decking image.
