# Installing the Trex RainEscape Post Flashing
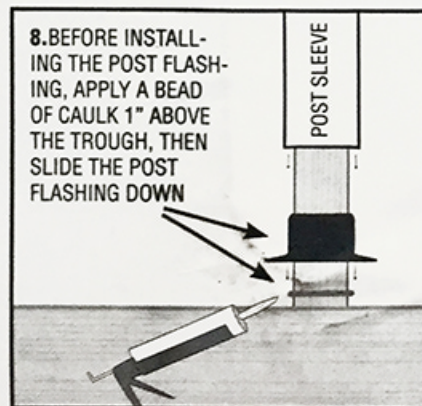

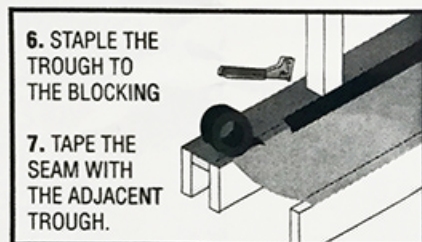

1. INSTALL FLAT BLOCKING

1. INSTALL FLAT BLOCKING BETWEEN RAILINGS

2. INSTALL THE ADJACENT TROUGH

2. FIT TROUGH MATERIAL & CAULK

3. MEASURE AND CUT ENOUGH TROUGH MATERIAL TO COVER THE BLOCKING, ADDING AT LEAST 2" OF MATERIAL TO OVERLAP THE ADJACENT TROUGH.

4. ROLL OUT THE TROUGH MATERIAL ON TOP OF THE BLOCKING, CUTTING OUT THE AREAS AROUND THE POSTS.

DRY FIT THE MATERIAL BEFORE ATTACHING.

5. BEFORE ATTACHING THE TROUGH MATERIAL, APPLY CAULK TO ALL SEAMS, AND THE SURFACE OF THE BLOCKING
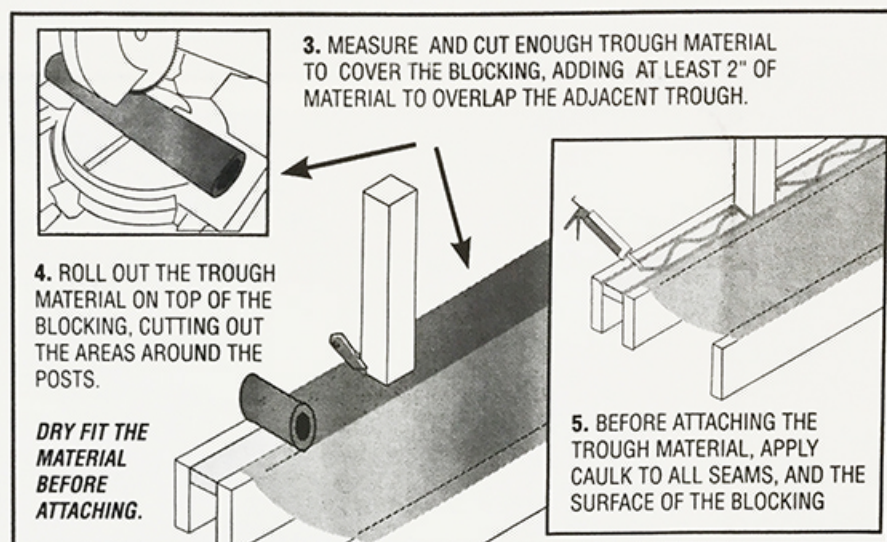

3. ATTACH TROUGH AND POST FLASHING

6. STAPLE THE TROUGH TO THE BLOCKING

7. TAPE THE SEAM WITH THE ADJACENT TROUGH.

8. BEFORE INSTALLING THE POST FLASHING, APPLY A BEAD OF CAULK 1" ABOVE THE TROUGH, THEN SLIDE THE POST FLASHING DOWN

POST SLEEVE
